Recent Projects

Blosm

Python/Django music sharing service web app aimed towards musicians seeking to collaborate. Users can sign up and easily upload their own media files to a separate media folder referenced by the SQLite database. The media player utilizes the Web Audio API for playback options.

Xinxin

Python/Django web app for the band XINXIN. It's RWD allows it to scale to mobile devices. It features a sign-up form that sends out postData to MailChimp email service. The website admin can sign into a User dashboard and from there can create new tour dates and store them in Django's SQLite database and delete them too. The tour dates are then displayed on the main band website.

LS E MEANSYNTH

MEAN/JS web app. Users can sign up play with a Musical Synthesizer, featuring sound generated by the Web Audio API. Users can store and retrieve their favorite sounds as JSON data in the MongoDB.

Relevant Experience

Coding Dojo / Developer in Residence

May 2017 - PRESENT, Burbank, CA

See recent projects.

Education

Coding Dojo

Jan 2017-Apr 2017, Burbank CA

Immersive 14-week bootcamp 12+ hours/day. Focused on Python/Django, Mean JS, and iOS Stacks. A typical day consisted of morning algorithm challenges, lectures, and daily projects.

Citrus College

Aug 2013 - May 2016, Glendora CA

Learned fundamentals of programming in Visual Basic and C/C++ and worked in MS Visual Studio. Collaborative projects include programming a Pololu 3pi Robot to solve the most efficient route of a maze.
